Accounting student Michelle Rosado traveled a winding road to Temple: transferring from Philadelphia Community College and then working part time to pay Temple’s tuition semester by semester. But now, being recognized as a PECO Scholar for her scholastic achievement means she can focus on her studies, and her future—“Wow, to know that you’re going to get that help…makes you work all the harder.”
WHERE HANDS-ON LEARNING DRIVES INNOVATION

“...one of the hardest things I’ve ever done,” said mathematics student Louis Graup. “I was questioning why I was even doing research. But that day I had a breakthrough and was finally able to do something that made sense; it motivated me to keep going.” Participating in the Science Scholars Program provides Louis, and students passionate about science and technology like him, with opportunities to work alongside Temple faculty on advanced research early in their Temple careers. For biology major Katie Steinberg, “coming into Temple, I wanted only to go to medical school, but being in the Science Scholars Program has allowed me to rethink the future I want.”

OVER HALF OF ALL UNDERGRADUATE STUDENTS PARTICIPATE IN PHILADELPHIA-AREA INTERNSHIPS.

WHERE WE EDUCATE IN A WORLD-CLASS URBAN ENVIRONMENT

For anthropology student Michael Madeja, “Temple was the best choice I could have possibly made!” Michael knew he wanted an academically challenging school and “from the get-go a city school, no matter what. In the city, there’s always something new to do.” And Michael has taken advantage of everything Philadelphia—and Temple—has to offer. Studying biological anthropology and interning with the Philadelphia Zoo shaped his Temple experience—“Philadelphia is a great resource for Temple students; there’s something for everyone here.”

WHERE GIVING BACK MEANS SO MUCH MORE

“I’m the first in my family to graduate college, and I think there are many young men and women at Temple who have that same story. I want to support these students who are following a similar path, so they don’t have to feel as if they’re doing it alone. They carry with them the opportunity for great advancements. They will change how people live and what we do in our everyday lives. With my gift, I am glad to be a part of that.”

Robert Figlin, CLA ’70, CST ’72

STUDENT-FACULTY RESEARCH OPPORTUNITIES RANK IN THE TOP 5 REASONS WHY STUDENTS CHOOSE TEMPLE.
